Energy Securities Options

[Option 1] (85 words)

In a world influenced by growing demand, American oil production has only declined since 1970.

The Energy Advocates works to educate the American public on energy security issues to prevent crises like the 1973 oil embargo that cut off our supply of imported oil.

America imports over 60 percent of our oil from foreign countries, but at the Energy Advocates, we believe that American solutions are the best answer to our energy needs.

[Option 2] (81 words)

American oil production has continued to decline since 1970, although our consumption has continued to increase.

Although the 1973 oil embargo cut off our supply of imported oil, our nation has grown to import over 60 percent of our oil today.

The Energy Advocates educates the American public on energy security issues because we want to prevent surprises like the ones we've had in the past and promote a stronger future for America's energy needs.

[Option 3] (86 words)

Petroleum products account for over 40 percent of the energy used in the United States today. This is greater than any other energy source, yet our domestic production actually peaked in 1970. Today we import over 60 percent from foreign countries.

The Energy Advocates educates the American public on energy security issues because we want to prevent surprises like the ones we've had in the past and promote a stronger future for America's energy needs.

Natural Gas Options

[Option 1] (83 words)

Today America imports around 23% of the natural gas that plays a vital role in powering our country's economy.

With demand for natural gas forecasted to grow by one third by 2025, domestic natural gas producers must continually drill new wells in the Gulf of Mexico and the states that account for the majority of the US's natural gas production.

The Energy Advocates believe in a strong future for America's energy needs.

[Option 2] (79 words)

Today America imports around 23% of our country's natural gas. Domestic production dropped nearly three percent in 2005, partly because of Hurricanes Katrina and Rita, but demand is only expected to grow by one third by 2025.

The Energy Advocates promotes education on energy security issues because we want to prevent surprises like the ones we've had in the past and promote a stronger future for America's energy needs.
